

Pre-Occupational Therapy Sample Course Plan¹

Freshman Year:

<u>Fall Term</u>	<u>Winter Term</u>	<u>Spring Term</u>
CH 221 + 227 lab (6)	CH 222 + 228 lab (6)	CH 223 + 229 lab (6)
MATH 111 (4)	MATH 112 (4)	PSY 201 (4)
WR 121 (4)	WR 122/123 (4)	SOC 204 (4)

Consider:

- Begin health-related experience as soon as possible
- Arts & Letters, Social Science or Multicultural classes
- Major requirements (*if a major has been chosen*)

Sophomore Year:

BI 211 (4)	BI 212 (4)	BI 213 (4)
PSY 202 (4)	PSY 302 ⁵ (4)	PSY 376 ⁴ (4)
HO 100 (3) (at LCC; This is medical terminology. It is not offered at UO)		

Consider:

- Continue health-related experience
- Arts & Letters, Social Science or Multicultural classes
- Major requirements
- Applied arts, performance, physical activity courses³

Junior Year:

ANAT 311 + 314 lab (5)	ANAT 312 + 315 lab (5)
HPHY 313 + 316 lab (5)	HPHY 314 + 317 lab (5)
ENG 200 ² (4)	PSY 469 ⁵ (4)

Consider:

- Continue health-related experience
- Arts & Letters, Social Science or Multicultural classes
- Major requirements

Senior Year:

PHYS 201 + 204 lab (6)	PHYS 202 + 205 lab (6)	PHYS 203 + 206 lab (6)
HPHY 409 (1)	HPHY 409 (1)	HPHY 409 (1)

1. This plan is a suggested set of courses. Pre-requisites to occupational therapy programs vary. It is important for you to check individual school requirements via their websites. Many schools do not require a year of general chemistry, and most schools require only one physics course with lab.

2. This is a public speaking course.

3. Many OT programs require at least one applied arts course and one P.E. course. Applied arts are "hands-on" courses such as design, ceramics, dance, photography, or music.

4. This course is Child Development. Pacific requires Life-span Development, which can be completed at LCC with PSY 215.

5. These courses are restricted to PSY majors and minors. See Pam Birrel in the PSY department if you are not a major.

2006-2007

Pre-Occupational Therapy Education at the University of Oregon

Prepared by:

The Office of Academic Advising
364 Oregon Hall (346-3211)

What is Occupational Therapy?

The primary focus of occupational therapy is the development of a person's adaptive skills and performance capacity. Therapists help with a person's ability to function in meaningful daily life activities or occupation. Occupational therapy also studies the factors that promote, influence or enhance such function, as well as those that create barriers or impediments to function. Occupational therapists may work with infants with developmental problems, older persons facing health challenges, persons with disabilities, or persons with mental illness.

What are the educational requirements for a career in occupational therapy?

Educational requirements for an occupational therapy career may take place at either the professional or the technical level. The professional level education prepares one to become an occupational therapist, while the technical level education prepares one to become an occupational therapy assistant.

Preparing for a career as an occupational therapist requires a student to complete either a bachelor's degree or postbaccalaureate degree (i.e. professional master's degree or entry level doctoral degree). Beginning January 1, 2007, all new occupational therapy candidates will need a postbaccalaureate degree. Preparing for a career as an occupational therapy assistant requires completion of a 2-year associate degree. In addition to these degrees, all candidates will be required to complete a period of supervised fieldwork and pass a national certification exam.

Other Requirements: If you are interested in applying to an occupational therapy program, you must obtain specific requirements, prerequisites, and program content from the schools to which you are applying. Junior year is when you should identify programs you would like to attend to prepare for application deadlines. Both occupational therapy and occupational therapy assistant candidates will be required to fulfill a number of prerequisites, which may include anatomy, physiology, and sociology. Most programs also require volunteer or paid work experience with persons with disabilities.

What is the difference between a postbaccalaureate degree and a baccalaureate degree for becoming an occupational therapist?

Both are currently routes of entry to the profession and accredited using the same Accreditation Council for Occupational Therapy

Education (ACOTE) Standards. A decision has been made however, to require postbaccalaureate degree entry as of January 2007. Therefore, there will be no accredited baccalaureate programs after that date. Successful completion of a baccalaureate or postbaccalaureate degree program currently qualifies an individual to sit for the National Board for Certification in Occupational Therapy (NBCOT) certification examination.

What is the job outlook for occupational therapy?

According to the 2000 AOTA Compensation Survey, full-time occupational therapists earned an average annual salary of approximately \$48,000 and full-time occupational therapy assistants earned approximately \$30,132.

What type of jobs are available?

Occupational therapy is one of the most diverse of health care professions. Jobs are available in hospitals, public school systems, rehabilitation facilities, home health agencies, hand therapy clinics, assisted living facilities, residential treatment facilities, injured worker clinics, community-based early intervention programs, and in corporations and communities performing preventative health care and wellness programs. Part-time, full-time, traveling, and on-call work is available.

Where do occupational therapy practitioners work?

Occupational therapists work in a variety of job settings. Public schools, hospitals, mental health centers, nursing homes, physician practices, and home health agencies are all job settings that may employ occupational therapy practitioners. With career advancement, occupational therapists may move into management, specialization, teaching, research, or private practice positions.
